Subject: EPA efficacy evaluation of rodenticides

Dear Kimberly,

Some years ago I was co-author of a chapter entitled "The Laboratory Evaluation of Rodenticides" in a text entitled "Rodent pests and their Control" (edited by alan Buckle and Robert Smith). In the preparation of this chapter, Bill Jacobs was kind enough to provide me with some useful information about EPA efficacy test requirements; in particular, Draft Laboratory Test methods OPP Designation 1.209 and 1.210.

I am in the process of revising and updating my chapter, and I would like to find out about the latest EPA requirements for efficacy evaluation of rodenticides. Would you be in a position to provide me with this sort of information?

I would be grateful for any help you can provide.

With many thanks

Colin
